

## Breakdown of the Convolution (1D and 2D)

# Convolutional Neural Network

# 1D Spatial Convolution

$$(f \times g)[n] = \sum_{m=-\infty}^{\infty} f[m]g[n-m]$$

# 1D Spatial Convolution

$$(f \times g)[n] = \sum_{m=-\infty}^{\infty} f[m]g[n-m]$$

# 1D Spatial Convolution

$$(f \times g)[n] = \sum_{m=-\infty}^{\infty} f[m]g[n-m]$$

# 1D Spatial Convolution

$$(f \times g)[n] = \sum_{m=-\infty}^{\infty} f[m]g[-(n+m)]$$

# 1D Spatial Convolution

$$(f \times g)[-5] = \sum_{m=-\infty}^{\infty} f[m]g[-(5+m)]$$

# 1D Spatial Convolution

$$(f \times g)[-5] = \sum_{m=-\infty}^{\infty} f[m]g[-(5+m)]$$

# 1D Spatial Convolution

$$(f \times g)[-5] = \sum_{m=-\infty}^{\infty} f[m]g[-(5+m)]$$

# 1D Spatial Convolution

$$(f \times g)[-5] = \sum_{m=-\infty}^{\infty} f[m]g[-(5+m)]$$

# 1D Spatial Convolution

$$(f \times g)[-5] = \sum_{m=-\infty}^{\infty} f[m]g[-(5+m)] = 15$$

# 1D Spatial Convolution

$$(f \times g)[-5] = \sum_{m=-\infty}^{\infty} f[m]g[-m]$$

# 1D Spatial Convolution

$$(f \times g)[n] = \sum_{m=-\infty}^{\infty} f[m]g[-m]$$

# 1D Spatial Convolution

$$(f \times g)[0] = \sum_{m=-\infty}^{\infty} f[m]g[-m]$$

# 1D Spatial Convolution

$$(f \times g)[0] = \sum_{m=-\infty}^{\infty} f[m]g[-m] = 20$$

# 1D Spatial Convolution

$$(f \times g)[0] = \sum_{m=-\infty}^{\infty} f[m]g[-m]$$

# 1D Spatial Convolution

$$(f \times g)[10] = \sum_{m=-\infty}^{\infty} f[m]g[-(-10+m)] = 10$$

# 1D Spatial Convolution

$$(f \times g)[10] = \sum_{m=-\infty}^{\infty} f[m]g[-(-10+m)] = 10$$

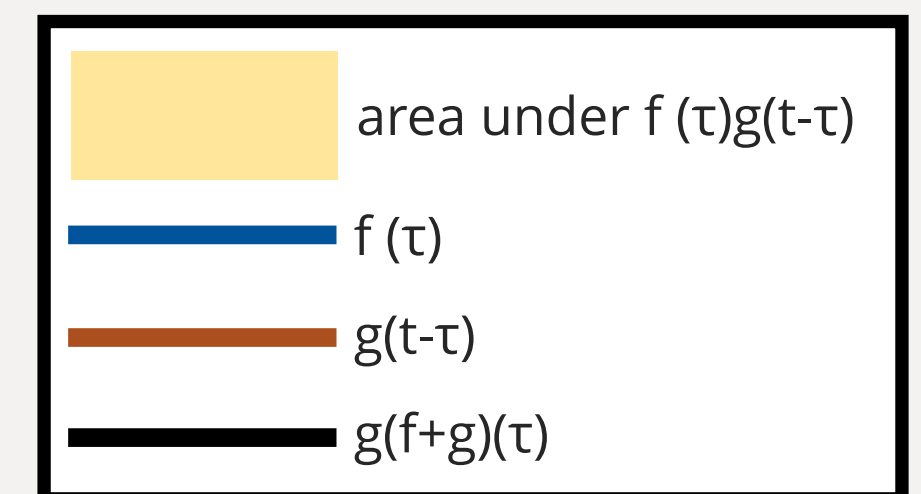

# 1D Spatial Convolution

$$(f \times g)[20] = \sum_{m=-\infty}^{\infty} f[m]g[-(-20 + m)] = 0$$
